*1970 Ye Domesday Booke*

Washington, D.C.: Georgetown University 1970

\$225w

First edition. Large square quarto. 92, [4]pp. Illustrated from photographs. Photographically-illustrated wrappers. Scrape in the bottom corner of the front wrap, soiling and small stains on the wrappers, some foxing modest foxing on a few pages, near very good. Indicated as Volume One, a memory book of Georgetown College, mostly photographs with minimal text, and with some concentration on protests and student politics. A somewhat ungainly and presumably isolated publication (we rather doubt their was a Volume Two) and very much of its time, displaying students preoccupation with politics and protest. *OCLC* locates no copies.
