

Victor Schwentker

The Gerbil: An Annotated Bibliography of the Gerbil as an Experimental Animal in Medical Research

Brant Lake, N.Y.: Tumblebrook Farm, Inc. (1966-1971)

\$125

First edition (see below). Quarto. Unpaged, chart. Slide ring bound combs with title printed on spine, with mylar over printed wrappers. Very near fine. The plastic slide could be opened to insert dated updates, the inserts here date between March, 1966 and March, 1971. This copy has the stamped number 439 on the titlepage, which would lead us to believe that this was a limited publication. Very scarce. [\[BTC#410210\]](#)
