was in these mountains that Plenty Coups went for his *vision quest* <sup>6</sup> to fast and to pray and to ask for help in guiding his people. He was gone so long that Bellrock, Bird Hat, and Push feared he might have encountered a band of Piegans from the north. They found him returning to the base camp greatly fatigued but triumphant. He had had a great vision, but one that he could not understand; and because of this, his friends took him to the medicine men -- the "wise ones."
