[Loose Photographs]: Ship During a Storm

late 1800s

\$500

A collection of five large cabinet card photographs measuring 7" x 9½". All items very good with some spotting, wore edges, and slight abrasions. A small archive of sepia-toned photographs mounted to cards with "portrait salon" on the verso depicting a ship during a storm in the late 1800s. The photographs are taken from the deck of the ship and show waves crashing against the side and the ship itself rocking in the rough surf. An interesting collection of images documenting a storm at sea from on board a ship. [\[BTC#431934\]](#)
